autotechshop.in

AUTOTECH is a manufacturer of car floor mats & seat covers for over 200+ car models. Our forte includes leather car mats & car seat covers tailored for individual car models, which are personalized as well as customized. We rely on our world-class infrastructure facilities to deliver premium quality Car Mats & Car Seat Covers. Our manufacturing unit is equipped with the latest technology and modern machinery, including machines for R&D and testing facilities. Proficient engineers and technicians play an important role in fabricating world-class Car Mats & Car Seat Covers.

Precision Redefined: Artec EVA 3D Scanner for Customized Automotive Interiors

The utilization of the Artec EVA handheld 3D scanner has proven to be immensely beneficial in the creation of customized floor mats and seat covers for individual car models. The process of obtaining precise measurements for these unique products has always been a major challenge. However, with the Artec EVA 3D scanner, this challenge is effortlessly overcome.

By implementing the Artec EVA 3D scanner, Autotech team is able to simplify the measurement process at the same time enhancing precision. With these precision scan and user-friendly functionality, the Artec EVA 3D

digital scanner redefines the possibilities of creating personalized floor mats and seat covers, leaving a lasting impression on the automotive industry.

In the realm of production, 3D data holds significant importance. The Artec EVA 3D Scanning machine proves to be the prime choice for this purpose. Its white light scanning system technology, coupled with smart hybrid geometry and texture tracking, ensures unparalleled accuracy in digitizing the products. Even when dealing with dark colors, such as black, the scanner excels in capturing every intricate detail with remarkable ease. This

capability streamlines the entire production process, reducing errors and ensuring that each customized floor mat and seat cover perfectly aligns with the unique specifications of the individual car model.

”

“Artec Eva smoothly capture the deep profile & play a key role in Digitization of Cars seat cover and their Floor Mats Services business, Autotech make customer experience the best combination of comfort & style ”
